

WR45 Wardrobe System.

WR45 Wardrobe System

WR 45 offers a variety of solutions for wardrobes in private houses, offices and hospitality.

- The sliding doors can be equipped with transparent, painted or decorative glazing in several thicknesses or wooden panels. The aluminium profiles are available in satin anodized or in two wood imitation colors. We offer two different shapes of vertical profiles.
- The filling panels can be mixed, glass, wood, or special PVC stripes, separated by a H-type profile. This gives a lot of possibilities to the interior designers.
- Optional the WR45 system can be equipped with a unique soft close mechanism built in the double top guiding profile.

Specification
